

The Dubai Blueprint: How We Automated 47 Leads/Week

The Strategy: High-intent traffic captured via instant AI qualification agents.

- **Phase 1: Ingestion:** Traffic lands via targeted social and search funnels.
- **Phase 2: The Core Workflow:** Instead of a static form hitting an inbox, a conversational multi-agent workflow parses the lead data against real estate inventory scripts within 45 seconds of submission.
- **Phase 3: The Handoff:** Fully qualified, hot leads are instantly booked directly into the Dubai agency's CRM/Calendar via webhook APIs without a single hour of manual qualification.
